SKILLS

- Penetration Testing
- Security Assessment
- Network Administration
- Exploitation Tools Development
- Attack Simulation
- Social Engineering
- Threat Analysis

EDUCATION

Bachelor's degree in Library, Information and Educational Technology, Al-Azhar University

JOB EXPERIENCES

Independent Cybersecurity

AnalystFreelance

2020 - 2024

- Testing and exploiting systems to identify vulnerabilities and weaknesses in networks and applications.
- Conducting comprehensive security evaluations to identify risks, threats, and vulnerabilities, followed by implementing effective measures to mitigate them.
- Developing and creating tools used for exploiting weaknesses or testing vulnerabilities in systems and applications.
- Simulating cyberattacks to evaluate and test the effectiveness of security measures and response capabilities.
- Designing and executing social engineering attacks to assess the human element in security and how easily individuals can be manipulated.
- Analyzing and identifying potential threats and vulnerabilities in a system to develop strategies for mitigation and protection.

Self-Learner in Cybersecurity Basics

2017 - 2020

- "Acquired foundational knowledge in Linux, networking (Network+), and hardware, with practical skills in Python programming and web development. Gained hands-on experience in network setup, basic penetration testing, and applied cybersecurity principles through self-study and online courses."
